

**Village of Slinger**  
**Flushing of Fire Hydrants**

**The Village's Water Department** will be flushing hydrants and exercising valves in the month of October 2020.

The combination of flushing and valve exercising may cause the water in the mains to become yellow or reddish color in nature. Although we will try to flush most of the particulate out of the main, we ask that you run your water several minutes at the end of the day. Flushing of the system and exercising of the valves is necessary to insure that the hydrants and valves are operating properly and to rid the system of natural occurring particulate (minerals) that build up in a public water supply.

If you see the crews in your area, it is best not to wash clothes until they complete the work in your area or until after 4:00 p.m. If you have any questions, please call the Village Hall at (262)644-5265.

Thank you!
